University of California, Irvine - Web Developer

Irvine, CA September 2017 - Contract

Assisted with building the redesigned website for the Biological Sciences department. Implemented the internal page templates including posts and search. Wireframed and features including the events and search, using Adobe XD. Reviewed, refactored, or removed legacy code. Performance optimizations for faster loading and adjustments for ARIA(accessibility). Custom plugin creation.

Technologies used included php, gulp, Sass, HTML5, javascript, jQuery, NPM and git.

entrepreneur.com - Web Developer

Irvine, CA August 2017 - Contract

Was brought on as a contractor to build their audio functionality for their podcast page.

<https://www.entrepreneur.com/listen>

Built the original prototype for the main jumbotron of article page which was adopted for the rest of the site. Based on the original XD file from their designer I created the slider functionality and it's animations.

<https://www.entrepreneur.com/read>

Technologies used included twig template engine for php, javascript, HTML5 audio, bitbucket for git version control.

Word & Brown - Web Developer

Orange, CA Oct 2016 - Jun 2017 - Contract

Main website Redesign - www.wbcompanies.com

Developed site with a custom WordPress theme while collaborating in a team of over 10 people. Designed the mobile layout and worked with the designers to create assets.

Technologies used included vim, git, PHPMyAdmin, Sass, NPM, Compass, version control, angularjs, Javascript, PHP, HTML5 animations, photoshop and illustrator. Twitter API.

* **Event Site** - www.wordandbrown.com/category/upcoming-events

Consolidated event functionality away from a legacy site.

* **Road Show Event microsite** - www.wordandbrown.com/roadshow

Development and mobile design based on aesthetic from original print campaign.

* **Personas Campaign** - <https://www.wordandbrown.com/future-brokers>

5 Pages catering to each persona of insurance brokers. Development, mobile UX.

* **Future Broker Blog** - <https://www.wordandbrown.com/insurance-broker-blog>

Implemented secondary blog. Created wireframes. Built with PHP and Javascript.

Bayside Domains - eCommerce Web Developer

Costa Mesa, CA Nov 2014 - Present

Developer of eCommerce and affiliate marketing sites in my own portfolio and to third parties.
